

PortalTrack®

PortalTrack® Software is a RFID data management tool which provides real time access to the information passed through Active and Passive RFID System installations. Designed on a **scalable** platform, the **PortalTrack®** solution has been deployed in a cross section of industry applications ranging from Manufacturing, Healthcare, College Campuses, Department of Defense, Distribution and Retail.

Combining our RFID hardware expertise with the **PortalTrack®** Software; Mid-South Marking Systems has implemented its RFID solution into the following applications:

- Security for IT assets containing critical patient data
- Compliance for Department of Defense and Retail
- Inventory control
- Shipping and Receiving verification
- Asset Management
- WIP and Product Identification

Features:

Real Time Visibility: Data is delivered instantaneously from Passive and Active RFID equipped devices.

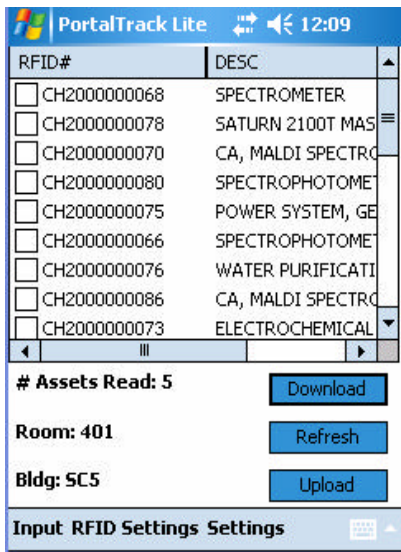

Robust Design: Scalable solutions ranging from select area monitoring to enterprise wide applications. Reporting features customized to fit your needs.

Pinpoint Accuracy: Locate devices and personnel within inches of the location using Active RFID Solutions

Event Monitoring: PortalTrack® can generate real time notifications and actions to safe guard your processes. Alarms, video, and email notifications can be activated when certain conditions are met within your application.

Device Manager: Management of external hardware is seamless within PortalTrack® . External readers, printers and sensors can be maintained via web-based interaction.

Software Specifications: PortalTrack® was designed to run on multiple platforms including; web-browsers, Windows Mobile Devices, and standalone PC's. **PortalTrack® Lite** offers the ability to utilize RFID on handheld portable devices for mobile applications such as Cycle Counts and Asset Management.

About Mid-South Marking Systems: For more than 25 years Mid-South Marking Systems has provided solutions-focused integration of Auto-ID technologies for a wide range of industries including; manufacturing, retail, healthcare, pharmaceutical, government, and distribution. Leveraging our expertise in Barcoding and RFID Technology, our expert staff has tailored solutions for hundreds of customers across the United States. To learn more call or email today.
